Dear families

Contact tracing in education and childcare settings

As you know, the Prime Minister further lifted COVID-19 restrictions over the summer. One of the key changes now in place is that education and childcare settings are no longer required to conduct routine contact tracing. As with positive cases in any other setting, NHS Test and Trace will work with either the positive case or, in the case of children, the parents, carers or guardian of the positive case to identify close contacts.

NHS Test and Trace already manages the contact tracing process for the rest of society – including children who have recorded a positive PCR test – and has expertise in supporting people to identify close contacts.

This letter sets out in more detail how that process works and what you need to do if your child tests positive for COVID-19.

Self-isolating and taking a test

1. If your child has symptoms, they should self-isolate and you should inform the academy. You should immediately order a PCR test for your child. If the PCR result is negative, they can stop self-isolating. If the PCR result is positive, they and any close contacts identified by NHS Test and Trace must self-isolate until 10 days after the onset of symptoms.
2. If your child has a positive result from a lateral flow device (LFD) test, they should self-isolate, and you should inform the academy. You should immediately order a confirmatory PCR test. If the confirmatory test is taken within two days and the result is negative, they can stop self-isolating. If the confirmatory PCR test is positive (or is taken more than two days after the LFD) they and any close contacts identified by NHS Test and Trace must self-isolate until 10 days after the LFD test.

For points 1 and 2 above:

Other members of your household will not need to self-isolate if any of the following apply:

- They are fully vaccinated – (14 days have passed since final dose of a COVID-19 vaccine given by the NHS).
 - They are under 18 years, 6 months old.
 - They are taking part or have taken part in a COVID-19 vaccine trial.
 - They are not able to get vaccinated for medical reasons.
3. PCR tests can be booked online through the [NHS Test & Trace website](#) or by calling 119.
 4. PCR test results will be recorded with NHS Test and Trace automatically, but you should also communicate the result to the academy.

Contact tracing

5. If your child gets a positive PCR test result, NHS Test and Trace will contact you using the details you registered when ordering the PCR test. You and/or your child will be asked a series of specific questions designed to identify who your child has been in close contact with. Being in an education or childcare setting with someone who has tested positive for COVID-19 will not necessarily mean a person is identified as a close contact.
6. You will be asked to provide the contact details, if you know them, of any of the individuals, or their parents or guardians, who have been identified as close contacts. NHS Test and Trace will then get in touch with these close contacts and provide appropriate instructions or advice.
7. If you are contacted by NHS Test and Trace, you must follow their guidance.

Close contacts

Children that have been in close contact with a positive case no longer need to self isolate and must attend the academy as normal. They will be asked by NHS Test and Trace to take an PCR test immediately (other than for very young children identified as non-household contacts), and they will not need to self-isolate while awaiting the results of the test. If the PCR test is positive, they will be required to self-isolate for 10 days from the date of the test. NHS Test and Trace will then get in touch to identify close contacts (see points 5 and 6 above).

At Dixons, we have shared with families when we have had a positive case in the academy. We will continue to do this in the autumn term. However, as stated above, the NHS will now be responsible for Test and Trace of any contacts of a positive case, not academies.

We recognise how difficult the past 18 months have been and the sacrifices that all families have had to make. This has been an enormously challenging time for everyone and we would like to take the opportunity to thank you for everything you have done to help keep our community safe.

Yours faithfully

Mr Robbins-Ross
Principal
